JETimage

Touch-screen Compatible Wide-format Multi-Function Software

You know the challenges of working with multiple systems and equipment – incompatibility and different user interfaces cost time, productivity and profits. Juggling multiple print jobs and more advanced reprographic tasks at once is difficult and time-consuming and can compromise customer service. Boost your bottom line with JETimage multi-function easy-to-use wide format copying software. Save time and money while providing high quality, professional service.

Work More Efficiently

Easy to set up and use, you can produce perfect copies in just three steps. Flexible plug-and-play printer connectivity and distributed copying capabilities mean you can tailor the solution to your unique workflow and share scanners and printers for different types of copying jobs. Send several print jobs to the printer at once with batch printing feature. Print collated sets and scale/re-size drawings up or down easily. Simple “big button” touch screen interface makes operation quick and easy, keeping your staff and your equipment productive.

Run a More Profitable Business

With advanced reprographic features you can offer more services to customers while saving time and money. Multiple layout options provide control for copy size, tiling, paneling and nesting to minimize waste on copies larger or smaller than the paper roll. The large viewing area lets you see image adjustments before printing to avoid costly mistakes. A built-in accounting feature enables job tracking by account name. And parallel printing allows multiple printers to work as a single logical printer to keep production speed up of quality color-matched copies or cleaned-up monochrome documents.

Scan, Copy and Print

Respond quickly to new business opportunities with flexible multi-purpose Copy/Print/Scan-to-file software with built-in touch screen compatibility. Compatible with most wide-format printers and optimized for a high production copying environment, you can do more and offer more services to your customers. Provide perfect color-matched copies with closed-loop and ICC color calibration. Get the most from your investment by sharing your scanner with other PCs on the network. Increase your output with manageable batch printing and easy print job configuration for correct sizing and scaling.

Key Features

- Multi-function Copy/Print/Scan-to-file software
- Compatible with most wide-format printers
- Simple “big-button” touch-screen compatible interface
- Easy to set up and use
- Optimized for high production copying environment
- Save to pdf, jpg, tiff, dwf file formats
- Accounting feature to keep track of billable services
- Print/Copy collated sets
- Simple closed loop and ICC color calibration for perfect color-matched copies
- Editing tools: lightness, saturation, levels, sharpness, blur
- Nesting feature to save paper on multiple copies
- Easy print job configuration for correct sizing and scaling
- Share the scanner with other PCs over the LAN – multiple users can share one license per scanner
- Large viewer to see adjustments before printing
