## **Contex Announces All-in-One Touch Multifunction Software**

### **New Full-Featured Version of Nextimage Adds the Ease of Touch-Screen Use**

**Alleroed, Denmark, August 28, 2009** -- Contex, the world-leading developer of wide format scanning and imaging solutions, today released Nextimage Touch wide format scanning and copying software with touch-screen capability. Nextimage Touch includes all the features of Nextimage SCAN+COPY software plus the ease of touch-screen use. This means that users can scan-to-file, scan-to-email, copy, edit files and print directly from the touch-screen interface, with no sacrifice of features or scan quality. It supports scanning and copying in color, grayscale and black and white and is compatible with both 32-bit and 64-bit versions of Windows.

Nextimage Touch is simple, powerful software designed to improve the efficiency of Contex's new wide format multi-function scanning solutions. Both the space-saving SD4430 MFP Office Copier and the versatile HD3650 MFP Multifunction Solution benefit from the touch-screen workflow offered by Nextimage Touch. Built-in support for most wide format printers, such as HP and Canon makes Nextimage Touch the perfect quick copy solution, and the built-in "batch mode" supports high volume jobs. Nextimage Touch broadens the Nextimage line of software and adds greater versatility to the Contex scanner line. Nextimage is perfect for both high end scanning systems or walk-up scan, copy and print systems.

"Nextimage Touch is very easy to use," says Brian Honeycutt, Product Manager, Wide Format Solutions. "Users simply touch the screen and start scanning or copying immediately with no keyboard input or mouse clicks. When text entry is necessary, the built-in keyboard enables entry directly from the touch screen. Nextimage Touch also includes scan-to-email, so images can be shared quickly and easily. Nextimage Touch is, very simply, the easiest, fastest way to scan, copy and share images."

Nextimage Touch is available with Contex wide format multifunction solutions from authorized Contex and VIDAR resellers, who can be contacted for pricing information and promotional offers.

#### **About Contex:**

Contex is the world's largest producer of large format imaging solutions, leading the market with constant innovation and technology development. Focused on providing the best image quality possible, Contex is the preferred supplier of scanning technology to the large format market. Contex's scanning solutions are supported by advanced scan and copy software applications – giving customers a full range of solutions for image capturing. Sold in over 80 countries worldwide, Contex products are praised for their reliability, value and performance. For more information, please visit [www.contex.com](http://www.contex.com).
